2024 ATLANTO-AXIAL INSTABILITY ASSESSMENT

Dear Health Care Provider:

The presence of Atlanto-Axial Instability (AAI) is a contraindication for mounted equine activities. In order to participate in mounted activities, all individuals with Down Syndrome must document the following on an annual basis:

- Yearly medical examination including a complete neurologic exam that shows no evidence of AAI or decrease in neurologic function.
- Certification by a physician that an examination did not reveal atlantoaxial instability or focal neurologic disorder.

This is to certify that my patient, _____ (name)
had a complete neurologic exam that did not indicate any symptoms consistent with Atlanto-Axial Instability or a focal neurologic disorder.

REMARKS:

Physician's Name: _____ License/UPIN Number: _____

Physician's Signature _____ Date _____
